6 UNITED STATES DISTRICT COURT
7 DISTRICT OF ARIZONA

8 ENS Labs Ltd., *et al.*,

No. 2:22-CV-01494-JJT

9 Plaintiffs,

DECLARATION OF HALLIE CAO

10 v.

11 GoDaddy Incorporated, *et al.*,

12 Defendants.

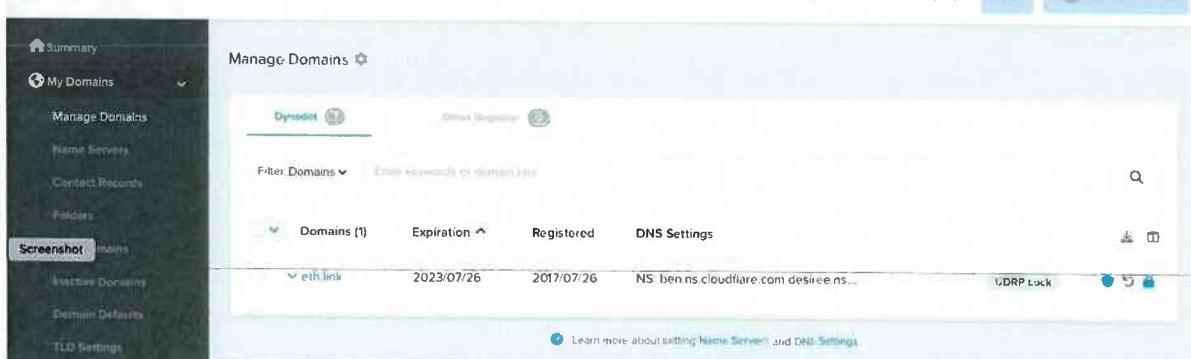

13 Hallie Cao, being duly sworn, deposes and says:

- 14 1. I am over the age of eighteen (18) years old and I am competent to testify to the
15 matters contained in this affidavit and the statements contained in this affidavit are
16 true and correct to my own personal knowledge, unless otherwise stated.
- 17 2. I am the Aftermarket Director at Dynadot, LLC (“Dynadot”). I have held this
18 position since January 1, 2020. I have been employed with Dynadot for over 9 years.
- 19 3. In connection with my position, I am familiar with registrar management and
20 administration, as well as the governing regulations issued by the Internet
21 Corporation for Assigned Names and Numbers (“ICANN”) and its Uniform
22 Domain-Name Dispute-Resolution Policy (“UDRP”) and rules.
- 23 4. On or about September 8, 2022, Dynadot became aware of an ownership dispute
24 involving the eth[.]link domain name (“Domain”) that was auctioned through the
25 Dynadot Auction Exchange (“DAX”) between August 26, 2022 to September 3,
26 2022.

- 1 5. An auction lock was automatically activated on the Domain at the conclusion of the
 2 auction, on September 3, 2022. The auction lock prevents transfer to another
 3 registrar and ensures payment for purchase. The auction lock automatically expires
 4 after fifteen days.
- 5 6. After receiving the September 9, 2022 Order, Dynadot modified the auction lock
 6 transfer restriction setting on the Domain, to one that would not automatically expire
 7 after fifteen days, this is the setting that is still active on the Domain. This is the
 8 most efficient way to set the domain name to a non-transferrable state.
- 9 7. The Domain was transferred to an account managed by Plaintiffs' counsel on
 10 September 14, 2022. (*See, Exhibit 3 – Transfer Log*).
- 11 8. On September 15, 2022, Plaintiffs' counsel accepted a prompt requesting acceptance
 12 of Dynadot's Terms of Use.

Logs (Show Count)								
2022	3	1	-	2023	4	17	Contact Record	Search
Date	Who	Type	Message					IP
2022/09/15 15:35	@customer	Contact Record	Contact Record C-961918 verified; agreed to S.A. IP: 38.142.6.114					38.142.6.114
2022/09/13 11:06	@customer	Contact Record	Contact Record 961918 Created; IP: 69.195.247.116; Name: Virgil Griffith; Email: aurbelis@crowell.com;					69.195.247.116

- 18
 19 9. The transfer restriction setting appears as “UDRP Lock” on the user-side panel.

Domains (1)	Expiration	Registered	DNS Settings	UDRP Lock
eth.link	2023/07/26	2017/07/26	NS benn.cloudflare.com desiree.ns...	On

- 1
2 10. The user-side panel, which shows the “UDRP Lock”, is not visible to website users.
3 11. This setting puts the Domain in a non-transferable state but does not otherwise
4 infringe on the use or ownership of the domain name.
5 12. As a result of activating a non-transferability setting, registrants are prevented from
6 changing the name servers of the domain name directly through their accounts’
7 control panels, however, they are able to submit change requests directly to the
8 registrar.
9 13. Pursuant to the ICANN requirements, Dynadot provides a 24/7 abuse reporting and
10 response service.
11 14. On March 27, 2023 and March 28, 2023, Dynadot received two abuse complaints
12 alleging that the Domain was hosting phishing scams. (*See*, Exhibit 1 – Abuse
13 Complaint 1 with response and Exhibit 2 – Abuse Complaint 2 with response and
14 supporting documents).
15 15. These abuse reports received by Dynadot contained allegations of phishing scams,
16 which pursuant to the ICANN rules must be investigated by the registrar.
17 16. Upon investigation by a customer service agent, the links were checked against the
18 records of Virustotal, a prominent third-party cyber-threat database, which identified
19 certain matches. (*See*, Exhibit 2).
20 17. As a result of the matches, Dynadot’s customer service agent turned off the
21 Domain’s resolution, disabling it on March 29, 2022 at 7:22 PST, and flagged the
22 Domain for additional review.
23 18. A senior customer service agent then reviewed this matter and reversed the remedial
24 action by restoring the domain name that same day at 9:07 PST.
25 19. The Domain was offline for about one hour to one hour and forty-five minutes.
26

1 I declare under penalty of perjury under the laws of the United States of America
2 that the foregoing is true and correct to the best of my knowledge.

3 EXECUTED this 15th day of May, 2023.

EXHIBIT 1

Abuse report IP: 212.73.134.219

Name: Leoinel

Email Address: leoinel123@proton.me

Domain Path: <https://tornadocash.eth.link/>

Domain names: eth.link

Comment: Hello Dynadot team,

there is a fraudulent phishing site on your domain servers which pretend to offer a service to money mix/launder cryptocurrencies which is totally fake. They also got no license or something to launder money in crypto, which is against the TOS.

They try to make look it real and fish people into "mixing" their cryptocurrencies on their site. But they only steal the cryptocurrencies which people send to that fake service and the fraudsters take it without giving out anything.

They promote their scam sites through search engine SEO.

A lot of people lose their hard earned money through this kind of scam.

The Phishing Domain is:

tornadocash.eth.link

They do always generate the same crypto address after entering a crypto address, so they receive all the money because the output crypto address belongs to them. That is how the scam works, the sended ethereum victims want to mix/launder goes instantly into the pockets of the fraudsters who host this domain.

It is a phishing site of the real service "Tornado.cash", Proof:
https://en.wikipedia.org/wiki/Tornado_Cash

Please take actions against these fraudsters and the abused phishing domain "tornadocash.eth.link".

Best regards,

Leoinel.

Domain names: eth.link

Comment: Hello Dynadot team,

there is a fraudulent phishing site on your domain servers which pretend to offer a service to money mix/launder cryptocurrencies which is totally fake. They also got no license or something to launder money in crypto.

They try to make look it real and fish people into "mixing" their cryptocurrencies on their site. But they only steal the cryptocurrencies which people send to that fake service and the fraudsters take it without giving out anything.

They promote their scam sites through search engine SEO.

A lot of people lose their hard earned money through this kind of scam.

The Phishing Domain is:

<https://anonymousemixer.eth.link/>

They had 2 same phishing domains and websites up which got both suspended, proof:
<https://www.whois.com/whois/anonymousemixer.com>

<https://www.whois.com/whois/anonymousemixers.com>

<https://web.archive.org/web/20221029175043/https://www.anonymousemixer.com/> (Backup of the suspended Phishing site)

The other Phishing Domain is:

<https://tornadocash.eth.link/>

It is a phishing clone of the Ethereum mixer Tornado Cash which is offline and got seized, Proof:

https://en.wikipedia.org/wiki/Tornado_Cash

The Phishing domains are hosted as subdomains from "Eth.link" which is hosted on Dynadot.

Their registrant information is also wrong and false from the domain holder.

Please take actions against these fraudsters.

Kind regards,

Earl.

The screenshot shows a web browser window with the URL <https://anonymousemixer.eth.link>. The page title is "Anonymous Mixer". A banner at the top left claims it is the "First Fully Decentralized Mixer" and highlights its use of Ethereum Name Service, InterPlanetary File System, and Smart Contracts for secure, private, and untraceable mixing. To the right of the banner are links for "Mixer", "Pricing", "FAQs", and "Support". Below the banner is a large image of a hooded figure with a mask, sitting at a computer keyboard, with the text "ANONYMOUS MIXER.ETH" overlaid. To the right of this image is a section titled "Your Anonymity is our Priority" with a subtext about regaining privacy from public blockchains. At the bottom of this section is a button labeled "Start Mixing Now".

First Fully Decentralized Mixer

Anonymous Mixer is proud to be the first **fully decentralized** mixing service. Utilizing cutting-edge technologies such as **Ethereum Name Service** (blockchain Domain Name), InterPlanetary File System (decentralized storage), Smart Contracts, etc. to ensure that every mixing transaction is secure, private, and untraceable. With our innovative approach to mixing, we are leading the charge in advancing the blockchain ecosystem towards a more decentralized and secure future.

Your Anonymity is our Priority

Anonymous Mixer allows you to regain your privacy when it comes to staying anonymous with your crypto finances. Because the majority cryptocurrencies such as Bitcoin, Ethereum and more, relies on a public blockchain. As long as someone (individuals, companies, government) can link your true identity to your wallet address, all of your financial activity is openly readable on the blockchain. The result is a full transparency regarding how much you hold (held), receive (received), and how you spend (spent) your cryptocurrencies. Mix your crypto today and regain your privacy in a heartbeat.

Start Mixing Now

Multi-Currency Mixer

Anonymous Mixer has been designed to provide the best mixing service to the most used cryptocurrencies.

Yusra,

Rather than argue whether Dynadot is or is not in compliance with the Court Order, we intend to transfer eth[.]link to our own registrar. The Dynadot account page, however, clearly states that there is a “UDRP Lock” on the eth[.]link domain. We confirmed this is still the case moments ago. Please remove the lock. If the lock prevents us from transferring—and it does—that is not in compliance with the Court Order.

External Email

Parker:

Dynadot is in compliance with the Court's order. There is no UDRP lock on the account. Your email refers to the account settings, whereby the domain name is set to non-transferable state. We understand that this prevents anyone from changing the name servers of the domain name. Dynadot, can change the name servers based on your clients' requests, which can be made directly to Dynadot. Alternatively, Dynadot is willing to explore a custom transfer lock for eth.link that would remove the UDRP notice from the account page.

Thanks,

Gallagher&Kennedy

Subject: TNL v. GoDaddy et al.

We have come to discover that Dynadot has placed a lock on the eth.link domain. The lock is in place subject to a UDRP proceeding. The UDRP lock directly impinges Plaintiffs' ownership interests in the domain, as it prohibits Plaintiffs from making changes to domain information or transferring the domain to a different registry. As there is no present UDRP proceeding underway, this lock is improperly in place. See e.g., ICANN Rules at ¶ 4 (only permitting a lock to be in place after the provider submits a verification request and only if the Registrar has "notif[ied] the Respondent of the [UDRP] proceeding"), available at <https://www.icann.org/resources/pages/udrp-rules-2015-03-11-en>.

Please release the lock on the eth.link domain by no later than December 13, 2022, at 3:00 PM PT. If you believe the UDRP lock is properly in place, please let us know. However, if we do not hear from you and the lock remains improperly in place, we will seek leave from the Court to enforce the preliminary injunction against Dynadot, which prohibits Dynadot from selling, transferring, purchasing, or accepting any "ownership interest in the Domain." See ECF No. 19 at 4.
